

TERMS & CONDITIONS (TERMS OF SERVICE)

Last updated: July 2026

1. Scope and Acceptance

These Terms of Service apply to the use of the **PetCatch** web platform and Progressive Web Application (PWA), including all connected location-based features, card-generation engines, and interactive modules. The App is developed and operated by **All4Pets**, with a registered address in **Pasig City, Philippines**. By accessing, registering for, or using the App, you explicitly acknowledge that you have read, understood, and agreed to be legally bound by these Terms.

2. Registration and Eligibility

- **Authentication:** Registration requires secure verification via Google Sign-In, Apple Sign-In, or a valid email address.
- **Age Limitation:** Use of the App is strictly limited to natural persons aged 13 or older, in compliance with applicable local protection laws. Users under 18 must obtain explicit parental or guardian consent.
- **Account Limits:** Only one unique user account per person is permitted. Creating multiple placeholder accounts or using automation scripts to farm rewards will result in immediate suspension.

3. Description of Services

PetCatch is a gamified, real-world multi-pet collection ecosystem that enables users to:

- Scan and capture real-life domestic animals (such as dogs, cats, rabbits, and birds) using a mobile web camera stream.
- Generate unique, gamified digital trading cards backed by on-device verification layers.
- Utilize an interactive, location-based map to view pet discovery locations globally.
- Check into physical partner locations (such as pet-friendly cafes, businesses, and conventions like **Pet Summit Philippines**) to log historical data and permanently imprint the location on captured cards.
- Interact with other users, view public leaderboards (broken down by overall metrics, animal categories, and specific breeds), and manage friend lists.
- View rewarded advertising placements to earn in-game perks.

4. User Responsibilities and Prohibited Use

- **Safety and Real-World Interaction:** Users must remain fully aware of their physical surroundings while tracking and capturing pets. Do not trespass on private property, violate local traffic laws, or disturb or endanger live animals or pet owners during gameplay.

- **Content and Copyright Integrity:** You are solely liable for the legality and copyright compliance of images captured or uploaded through your account.
- **Prohibited Conduct:** Users are expressly forbidden from uploading illegal, offensive, harassing, or inappropriate imagery. You may not use automated tools, scraping mechanisms, or GPS-spoofing software to falsify coordinates or manipulate real-world game balancing.

5. Fees and Premium Virtual Features

- **Free Basic Access:** Core functionality, including scanning animals, exploring maps, checking into events, and viewing leaderboards, is fundamentally free to use.
- **Virtual Items:** Premium features, custom cosmetics, or specialized digital boosts may be offered for a fee, with rates transparently declared prior to checkout. Paid transactions are processed safely through authorized web-payment gateways or app-store commerce infrastructures.

6. Limitation of Liability

- **Availability:** All4Pets offers the service on an "as-is" and "as-available" basis without explicit warranties of uptime, server constancy, or error-free rendering across all mobile browsers.
- **Third-Party Content:** All4Pets does not claim responsibility for user-submitted image context or for the operational maintenance of individual partner locations or events pinned on the map.

7. Termination

- You may voluntarily delete your user profile and collection history at any time directly inside the App settings.
- All4Pets reserves the right to immediately suspend, restrict, or delete accounts found violating these Terms, engaging in geolocation forgery, or uploading non-compliant visual files.

8. Governing Law and Dispute Resolution

These Terms shall be governed by and construed in accordance with the laws of the **Republic of the Philippines**. Any legal actions or disputes arising from the scope of these terms shall be filed exclusively before the competent courts of **Pasig City, Philippines**.

For questions, support, or complaints, please contact us at: all4petspawty@gmail.com

PRIVACY POLICY

Last updated: July 2026

1. Data Controller and Compliance Focus

The Data Controller responsible for your personal information is **All4Pets**, located in **Pasig City**,

Philippines. We are completely committed to protecting your personal information in strict accordance with the **Philippine Data Privacy Act of 2012 (R.A. 10173)**, its Implementing Rules and Regulations (IRR), and international privacy conventions.

- **Contact Email:** all4petspawty@gmail.com

2. Data We Collect and Process

To properly run the PetCatch mobile ecosystem, we collect several categories of information:

- **Registration Data:** Name, email address, and profile image shared when establishing an account through Google or Apple Sign-In authentication parameters.
- **Gameplay and Collection Records:** Dynamic statistics, pet species/breed classifications, user-assigned custom names, and visual cards created over the course of application interaction.
- **On-Device Biometric Signatures (Animal Specific):** A mathematically processed vector fingerprint generated from standard 2D camera photos of an animal's face or fur patterns. *Note: This mechanism isolates animal morphology strictly to ensure database uniqueness and does not parse or map human facial geometry.*
- **Precise Geolocation Data:** Real-time spatial coordinates (latitude and longitude) captured via the browser's native API *only* while actively mapping a spot, executing a check-in, or performing a capture. We do not run background location tracking.
- **Technical Identifiers:** Anonymized device tokens for optional push notifications, mobile browser configurations, active operating system versions, and diagnostic crash reports.

3. Purpose and Legal Basis for Processing

We process personal information under the following legitimate circumstances:

- **Contract Fulfillment:** To render the application mechanics functional, load the interactive discovery map, and save customized cards to your profile.
- **Consent:** When you check the terms authorization during account generation to enable localized web notifications, access location services, or allow anonymized tracking performance.
- **Legitimate Interest:** To preserve competitive gameplay integrity by matching extracted vector metadata against existing entries to recognize unique discoveries and block spoofing attempts.

4. Data Sharing and Third-Party Processors

To keep server maintenance lean and optimize application reliability, we use a selection of standard modern service layers to manage infrastructure. All data transfers are structurally safeguarded via strict confidentiality commitments:

- **Database and Hosting:** Cloud data services (such as Supabase, Vercel, or cloud storage buckets) to hold account records, transaction tables, and compressed pet images securely.
- **Map Tiles:** MapTiler API to securely fetch custom-designed playful visual themes on MapLibre map renders.
- **Analytics and Crash Logs:** Tools to capture anonymized performance anomalies to identify bugs across mobile browser versions.
- **Advertising Networks:** Google AdMob to deliver rewarded video units and banner

spaces to support the free platform.

5. On-Device AI Processing Mechanics

- **Local Execution:** The operational extraction of animal breed classifications and signature vectors occurs entirely on your device via client-side libraries (e.g., Transformers.js or TensorFlow.js) before hitting network protocols.
- **Incidental Elements:** While the camera targets animals, human faces could occasionally sit within wide background fields. We do not evaluate, track, compile, or monetize accidental human visual signatures.

6. Information Sharing with Other Users

By default, your profile name, general statistics, and collection entries are displayed across high-score boards and community leaderboards. Approximated pet capture locations are visible publicly on the global game map to let other collectors discover where target breeds spawn. You may manage specific field visibility parameters through individual Account Profile settings.

7. Retention and Data Deletion Rights

- **Account Deletion:** You have the legal right to close your user account at any time. Upon doing so, personal identifiers, login data, and contact coordinates will be securely purged from production databases within 30 days.
- **Game Integrity Exemption:** To protect map consistency and safeguard the historical record of community leaderboards, the anonymized pet cards, breed statistics, and location tags you discovered will persist inside the database, but will be permanently de-linked from your identity.

8. Your Legal Rights Under the Philippine Data Privacy Act

As a data subject in the Philippines, you hold explicit rights that you can assert by emailing our data team at all4petspawty@gmail.com:

- **Right to Be Informed:** Knowing whether your data is being processed.
- **Right to Access:** Requesting an export of your specific account records.
- **Right to Object:** Refusing the processing of your data for marketing or advertising purposes.
- **Right to Erasure or Blocking:** Ordering the removal of your personal profiles from active frameworks.
- **Right to Rectification:** Instantly updating inaccurate details on your user dashboard.

9. Amendments to this Privacy Policy

All4Pets reserves the right to adjust this Privacy Policy to match new security standards or application update rollouts. The latest active version will always remain accessible on the web-app portal. Continued play after updates go live constitutes active acceptance of revised provisions.
